

# Rejuvenate

Lift

Tighten

Refresh

## Major Benefits:

- Reduces the depth of wrinkles around the eyes.
- Instantly tightens and lifts the skin.
- Make the skin appear smoother and more uniform.
- Increase the moisture retention of the skin around the eyes.

Rejuvenate offers instant tightening and moisture. At last, a new generation tightening agent to guarantee rejuvenation, comfort and real hydration benefits in just a few minutes. Rejuvenate effectively and significantly smooths and offers temporary relief from the main characteristics of skin wrinkling, sagging, puffy skin, and other signs of aging. Comfortable on the skin, Rejuvenate leaves the skin soft and silky. It gently tightens skin mechanically without any unpleasant feel. Using Rejuvenate daily helps with, anti-sagging, anti-fatigue and also moisturizes. It is perfect for crow's feet, orange peel (cellulite), flabby skin, and temporary reduction of wrinkles.

A Natural Alternative to  
Cosmetic Surgery or Botox

The Main Patented Ingredients in Rejuvenate are:

### SESAFLASH™

(INCI: Glycerin (and) Acrylates Copolymer (and) VP Polycarbamyl Polyglycol Ester (and) Hydrolyzed Sesame Protein PG-Propyl Methylsilanediol)

#### A Comfortable Tightening Agent

The efficacy of SESAFLASH™ is unanimously felt by the consumer. The sensory effect is described to reflect 100% firmer and smoother skin with no tacky afterfeel nor skin discomfort too often associated with tightening agents.

#### Extra Benefit of the Skin Moisturizing Effect

In addition to the tightening effect, SESAFLASH™ also provides hydration to the skin.

### Deepaline PVB

#### Anti Wrinkle & Restructuring

A wheat bioprotein, which stimulates vital skin cells preventing the phenomena of skin aging. It has moisturizing properties and maintains natural skin acidity. A natural alternative to anti-age surgery obtained through a double scientific performance.

### Matrixyl 3000

Matrixyl is palmitoyl-pentapeptide 3 and this is a peptide that specifically stimulates collagen synthesis and skin repair. This means it qualifies as a long-term aging system.

#### Argireline or Acetyl Hexapeptide -3

Peptides are small fragments of proteins. Proteins are the main building blocks of nearly all living tissues. Argireline, acetyl hexapeptide-3, is a chain of six amino acids that are attached to the residue of acetic acid. Topical application of Argireline is the only method of delivery that as yet has been tested. It relaxes the muscles used in face movements, thus allowing a significant reduction in the depth and size of wrinkles without having to lose your daily facial expressions, especially smiling!

## A Unique New Generation Tightening and Lifting Natural Alternative for both women and men in today's fast moving, multi-tasking world.

Rejuvenate's High Density All Natural Formula lifts, tightens and rehydrates skin in just a few minutes.

Rejuvenate is a natural alternative to cosmetic surgery and helps to redensify and smooth out deep wrinkles.

The combination of carefully chosen ingredients when applied daily will help the skin regain a radiant and younger appearance.

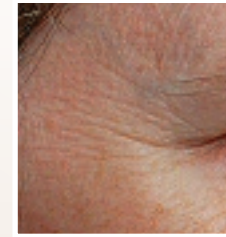

#### Directions For Use:

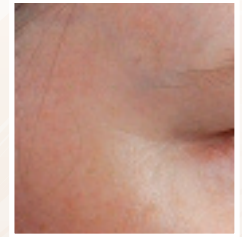

Before applying Rejuvenate, cleanse face and neck with warm water and pat dry. Apply to the face, neck and around eye area for best results. Gently massage in evenly over the skin until completely absorbed.

After a couple of minutes make up can be applied when the product is absorbed.

Daily use is recommended.

before application

5 minutes after application - 10% SESAFLASH™

#### Other Active Ingredients:

#### Marine Collagen –

Collagen is 30% of the body's total proteins and 70% of the skins'. Collagen keeps the skin looking its best by helping cells to renew themselves, keeping the skin moist and supple and prevents the appearance of wrinkles. The natural Marine Collagen comes from the ocean and not from the stockyards, and is more easily absorbed than Bovine Collagen.

#### Emu Oil –

One of the best carrier oils known to man, it aids in the transport of the bio-active ingredients in Rejuvenate. Natural substances found in Emu Oil are Vitamin E (anti-oxidant and healing agent), Vitamin A (anti-oxidant and skin repairer), Terpinenes (an antiseptic) and Saponins (a skin softener).

#### DMAE –

DMAE has been shown to greatly improve the effects of sagging skin and it is also known to enhance the performance of other anti-oxidants such as Vitamins A, E, and C. DMAE has also been shown to reduce the appearance of wrinkles and fine lines around the neckline, jowls, and under the eyelids and cheeks.
